## ORDER COVERING ADMISSION OF FOREIGN POTATOES UNDER RESTRICTION.

The Secretary of Agriculture has determined that the unrestricted importation from any foreign country of the common or Irish potato grown in the Dominion of Canada, Newfoundland, Great Britain, Ireland, Continental Europe, and other foreign countries, may result in the entry into the United States, its Territories and Districts, of injurious potato diseases, including the powdery scab (*Spongospora subterranea*), and injurious insect pests.

Now, therefore, I, DAVID F. HOUSTON, Secretary of Agriculture, under authority conferred by section 5 of the act of Congress approved August 20, 1912, known as "The Plant Quarantine Act" (37 United States Statutes at Large, page 315), do hereby determine and declare that, on and after January 15, 1914, common or Irish potatoes imported or offered for import into the United States or any of its Territories or Districts shall be subject to all the provisions of sections 1, 2, 3, and 4 of said act of Congress.

Done at Washington this 22d day of December, 1913.

Witness my hand and the seal of the United States Department of Agriculture.

Secretary of Agriculture.

# REGULATIONS GOVERNING THE IMPORTATION OF POTATOES INTO THE UNITED STATES, UNDER THE PROVISIONS OF THE ORDER OF THE SECRETARY OF AGRICULTURE, ISSUED DECEMBER 22, 1913.

---

## Regulation 1. Definition.

For the purpose of these regulations, the term "potato" shall be understood as meaning the common or Irish potato (*Solanum tuberosum*) and its horticultural varieties.

## Regulation 2. General Conditions Governing Potato Importations.

Potatoes will be admitted from any country or well-defined district thereof not specifically mentioned in Notice of Quarantine No. 11, issued December 22, 1913, when it is determined by adequate field inspection conducted by recognized experts of the country concerned that such country or district thereof is free from injurious potato diseases and injurious insect pests, and such country must further agree to examine and certify all potatoes offered for export in compliance with these regulations: *Provided*, That the entry of potatoes will not be permitted from any country unless such country has an effective quarantine prohibiting the entry into such country or district thereof of potatoes from any country or district under quarantine by the United States: *Provided further*, That potatoes grown in a district which is believed by a duly authorized official to be free from injurious potato diseases, and which have at the time of the issuance of these regulations been taken from the ground and stored, may be certified after inspection as hereinafter provided in Regulation 5.

Quarantine of the countries specifically mentioned in Notice of Quarantine No. 11, issued December 22, 1913, may be lifted by the Secretary of Agriculture, as to the country or a district thereof, upon satisfactory evidence that such country or district thereof is free from injurious potato diseases and injurious insect pests, and thereafter potatoes will be admitted under and in accordance with these regulations.

Entry of potatoes will not be allowed unless the invoice is accompanied by an original certificate and unless each container bears a copy certificate in accordance with Regulation 5.

Potatoes will be admitted into the United States only through the port designated in the permit.

The entry of potatoes will not be permitted except where the shipments pass directly from the country of origin to the port of entry in the United States: *Provided*, That when transshipment is necessary at a port of a country under quarantine such transshipment shall be made by lighters from boat to boat in the harbor without landing the potatoes, and the consular invoice of place of origin must follow the shipment from original port of departure to the port of entry in the United States.

No shipment of potatoes will be permitted entry until it has been examined by an inspector of the Department of Agriculture and found, or believed, to be free from the wart disease and the powdery scab and other dangerous plant diseases and dangerous insect pests.

Shipments of potatoes inspected as provided herein found to be infested with wart disease or with powdery scab or other injurious plant diseases, or with injurious insect pests, will be refused entry.

All charges for storage, cartage, and labor incident to inspection, other than the services of inspectors, shall be paid by the importer.

#### **Regulation 3. Applications for Permits for Importation of Potatoes.**

Persons contemplating the importation of potatoes shall first make application to the Federal Horticultural Board, Department of Agriculture, Washington, D. C., for a permit, stating in the application the name and address of the exporter, the country and locality where grown, the port of departure (or port of consular invoice), the proposed port of entry, and the name and address of the importer in the United States to whom the permit should be sent.

Applications for permits must be made in advance of the shipment of the potatoes.

Applications may be made by telegraph, in which case the information required above must be given.

Permits are not required for potatoes entering the United States for immediate transportation in bond to foreign countries.

**Regulation 6. Notice of Arrival of Potatoes by Permittee.**

Immediately upon arrival and before unloading from the vessel or other carrier the permittee shall notify the Secretary of Agriculture, on forms provided for that purpose, stating the number of permit, the quantity of potatoes included in the shipment, the country and locality where grown, the name and address of exporter or shipper, the port of departure, the date of arrival, and the name of the ship or vessel if transported by water, and the designation of the dock where the potatoes are to be landed; and, if by rail, the name of the railroad company, the car numbers, and the terminal where the potatoes are to be unloaded.
